PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in full-stack development, REST API design, and automation. Proficient in Python, JavaScript, React.js, Flask, and MySQL, with hands-on AWS experience. Holds an M.Sc. in Computational Science from Laurentian University, with a focus on Machine Learning and Cloud Computing.

RELEVANT EXPERIENCE

Software Engineer

Jan 2023 – Mar 2024

TechAlias Solution Pvt. Ltd.

Nepal

- Built and maintained full-stack web applications using React.js, Flask, and MySQL, contributing to improved page load speed and a smoother user experience.
- Developed and documented RESTful API endpoints consumed by the frontend team, reducing integration issues and turnaround time.
- Debugged and resolved recurring application issues through systematic testing, improving overall system stability.
- Optimized MySQL queries and restructured database schemas, leading to faster data retrieval on key application pages.
- Worked in a small agile team, collaborating with designers and developers to ship features on schedule.

Graduate Instructor (Lecturer), Computer Science

Sep 2022 – Mar 2024

ACME Engineering College

Nepal

- Taught Python, C++, SQL, and web development fundamentals to 100+ undergraduate students.
- Designed practical lab exercises and mini-projects to connect classroom theory with real-world coding.
- Ran workshops on Python scripting and data analysis tools, giving students exposure to industry-relevant skills.
- Worked with faculty to update course materials and align the curriculum with current software development practices.

EDUCATION

Master of Science, Computational Science

May 2024 – April 2026

Laurentian University

Sudbury, ON, Canada

- Relevant Coursework: Intro to Computational Science, Cloud Computing, Research Methods, Machine Learning.

Bachelor of Technology, Computer Science and Engineering

Aug 2017 – May 2021

SRKR Engineering College

Andhra Pradesh, India

- Relevant Coursework: Data Structures, Object-Oriented Programming, Deep Learning, Operating Systems, Database Management.

PROJECTS | MORE ON GITHUB

URL Shortener with Authentication | React.js, Flask, MySQL

2023

- Built a full-stack web app where users can register, log in, shorten URLs, and manage them through a personal dashboard.
- Implemented session-based authentication and created REST API endpoints for URL creation, redirection, and user management.
- Used MySQL for persistent data storage and Flask for backend routing and business logic.
- GitHub:** [URLShortener_with_Authentication_System](#)

NEPSE Stock Telegram Bot | Python, BeautifulSoup, Telegram API

2022

- Built a Telegram bot that fetches and sends live Nepal Stock Exchange (NEPSE) data to users on demand, removing the need to check the website manually.
- Used BeautifulSoup to scrape stock data and the Telegram Bot API to handle user commands and deliver formatted responses.
- GitHub:** [NEPSE-Telegram-Bot](#)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C++, SQL

Frontend Technologies: React.js, HTML5, CSS3, Bootstrap

Backend Technologies: Flask, Django, REST APIs

Databases: MySQL, PostgreSQL

Libraries & Frameworks: NumPy, Pandas, Matplotlib, OpenCV, Selenium, BeautifulSoup

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Linux

Cloud & Platforms: AWS (EC2, S3)

Core Concepts: OOP, Data Structures & Algorithms, SDLC, REST API Design, Debugging
